Summary

Frontend developer focused on React and TypeScript with commercial startup experience and a frontend internship at Yandex. Built user-facing product interfaces, integrated frontend with backend APIs and worked with real-time interaction flows. Interested in modern React/Next.js development and building maintainable product interfaces.

Projects

Next Ecommerce Store Jan 2026 – Feb 2026

https://github.com/OldPole/Next-Ecommerce

React Series Poisk Jan 2026

https://github.com/OldPole/React-Series-Poisk

Education

Belarusian State University of Informatics and Radioelectronics

Bachelor's Degree • 8.33

Game design Sep 2024 – 2028

Experience

Yandex Moscow

Frontend Developer Intern Jul 2026 – Sep 2026

Worked as a Frontend Developer Intern on the Yandex Search Interfaces team. Delivered production frontend features for Yandex Search and Alice Chat end-to-end: from implementation and automated tests to A/B experiments, feature-flag rollouts, and production releases. Also resolved UI regressions in user-facing Search and Alice interfaces.

Aligned Hearts Minsk

Frontend Developer Apr 2026 – Jun 2026

Developed the frontend for an AI-powered relationship conflict resolution product using React and TypeScript. Implemented profile and settings pages, room creation and messaging flows, and built reusable UI components. Integrated the frontend with backend APIs and real-time

communication through WebSockets, while also improving existing features and fixing production issues.

Innowise Group Minsk

React Developer Intern Nov 2025 – Mar 2026

During my React Developer internship at Innowise, I built web applications from scratch using React and TypeScript, implemented production-ready features and complex business logic, and improved existing functionality. I also worked with Feature-Based Architecture, code reviews, and Agile methodologies in a team environment.
